5 Assistant Commissioner for Patents,
Washington, D.C. 20231

Dear Sir:

This amendment is responsive to the Office Action dated January 17, 2001.

REMARKS

10 Claims 1-4 are pending in the application. All of these claims were rejected under 35 U.S.C. § 102 as being anticipated by Brueckheimer (WO 95/32596).

Applicant has provided discussion for distinguishing the present invention from Brueckheimer .

35 U.S.C. §102(b), Claims 1-4 Anticipation by Brueckheimer

15 1. Brueckheimer does not teach the claim 1 element of: both the exchange termination and the line termination respectively have a means for connecting to a user interface.

According to claim 1 of the invention, digital signals are transmitted between an exchange termination and a line termination, each of which have a means for
20 connecting to a user interface of an ATM network.

Brueckheimer does not mention either an exchange termination or a line termination or even a branch exchange. The E1 and the T1 trunk system described in Brueckheimer just have an ordinary line interface function for E1 and T1 transmission lines being operated at a defined transmission rate without providing the function of an
